2. TrunkPCR version 0.90.282 Now Available

Newsgroup: rec.radio.scanner
Date: 2012-01-21 23:39:08 UTC
From: Jay <crazy__c@hot_mail.com>
Message-ID: <jffirb$v6c$2@adenine.netfront.net>
Source record: 23

TrunkPCR version 0.90.282 Now Available for Downloading from the NEW
Homepage:
"http://www.fiftyonefiftysystems.com/TrunkPcr/TrunkPcrDwnld.html"

NOTE: Moto Type-I Support *should* be finished in the next major update.

This update has One Fix and Two Additions...

Jan 12,2012 - Added: Country Agencies in RadioReference Import.
Jan 18,2012 - Fixed: Editing Frequency in Main Display using keyboard.
Jan 20,2012 - Added: Freq Plan Calculator.

Version 0.90.282 Released 01/21/2012

The Frequency Plan Calculator is a tool to help you determine UnKnown
Frequency Plans.

Using the Frequency Plan Calculator.

1) Identify the Base Frequency:
a. Select the LCN that is associated with the Active Control Channel.
b. Enter the Correct Frequency of the Active Control Channel.
c. Adjust Offset and Step Rate if needed.
d. Click the [Calculate Base] Button.

2) Determine Voice Channel Frequencies:
a. Select the LCN that is associated with a Voice Channel.
b. If the Base, Offset and Step is correct, its correct Frequency will be
shown.
c. If Not, then be sure the Step Rate is correct and adjust the Offset.
d. Repeat steps 2a to 2c for the rest of the entries in the Frequency
Found List.

3) Extended Freq Plans:
These can be identified with different Base Frequencies and Offsets.

Normally, the Base Frequency will end in 0000 (ex: 406.0000).

When you have determined the correct Offset and Step Rate, you can click on
the
other entries in the Frequency Found List and it's corresponding Frequency
will
be calculated and shown in the Channel's Frequency textbox. If the
calculated
Frequency matches the correct Voice Channel Frequency, click the [Save
Entry]
Button.

If you discover that different clustered LCN's have a different Base
Frequency
and Offset, then this system would use the Extended Freq Plan.

Regards,
Jay

You are so screwed up, when it comes to US Radio Law, you wouldn't know
the REAL FACTS, if they bit you in the Arse....

First Off: What Cops, are saying WHAT, about which Frequencies?
Be VERY specific....
Second Off: It would be VERY hard to a local prosecutor to try
such a case, even in a local Court, KNOWING that
it would likely be overturned in the first Federal
Court where the case landed.
Third Off: Local Cops, and even State Cops, do not have jurisdiction
in the enforcement of FEDERAL Laws, and should they try,
the local Federal Marshal would slap them down in a
nanosecond. That is HIS Job.
Fourth Off: Cops can, and do, say a lot of stuff, about which they have
NO CLUE, just like YOU do. Just because some local IDIOT
LEO says something, does NOT make it True, or in fact
Legally, the LAW. I have testified in MANY Courts of Law
on just these kinds of issues, and mostly the local LEO
has it WRONG, and the IDIOT Prosecutor, gets his hands
slapped by the local Judge, once the correct FEDERAL
Statutes, are introduced into Evidence, if it ever
actually gets that far, in the first place.....
I mean REALLY... Duh....

Just Say'en..... YMMV.....

first off, radioguy is a frickin ignorant asswipe,
second off, local cops enforce federal law every day of the year.
e.g., a convicted felon is found with a gun. that's a federal law.

when sworn in they take oaths to "uphold the laws of the United States and the US Constitution....".

US marshalls rarely deal with cops who enforce the law.

Read the constitution. You will find that sheriffs are the law.
It's only when you have assholes like Eric Holder running the country do you hear them whining about local cops enforcing federal law.

The law prohibiting the constructive possession of a fire arm for
convicted felons is the law in many, if not all, states.

>when sworn in they take oaths to "uphold the laws of the United States and

I'm confused.
The public service bands are either above or below the amateur bands.
The police - unless they are licensed amateur radio operators - are not
allowed to use the amateur radio bands, nor is a amateur radio operator
allowed to operate on the public service bands with a part 97 type
approved radio.

If you polled 100 State or local police officers, 99 of them wouldn't
even know how to turn my radio on and 99 of them wouldn't even be able
to edit the frequencies programmed into my radio to even know what pl's
and other information was stored in my radio.

POLE ICE by nature, doesn't have to have a license to operate on the
public service bands, because they are licensed by the FCC to operate on
the public service bands. But, they cannot go on the Amateur Radio
Frequencies unless they have a license - for each cop and a call sign -
for each cop.
It's ILLEGAL to give licenses to anyone.
You have to pass a test and earn a amateur radio license.

The TWO METERS is nothing but the kindergarten of amateur radio
anyways.
Get a General Class License and come on up and play with the big boys on
the HF little man.

Kent, the boy is a fruit cake.
What he's talking about here is the two frequencies are actually shared
with both ham and police. But some police departments feel because they use
it, you can't.

Local and State Cops Do NOT enforce Federal Law... They enforce State Law... What you cite is cases where BOTH State and Federal Statutes prohibit a convicted Felon from possessing a Firearm, and the local or State cops are enforcing the State Statutes, NOT the Federal One.

>
> US marshals rarely deal with cops who enforce the law.

apparently you have never dealt with a US Marshal... I have, many times, as a Resident Field Agent for the FCC, reTIRED... and know exactly of what I speak..... When on land, the US Marshal provides any muscle needed for ALL Federal Agencies that do not have Police Powers, inherent in their founding Statutes. On the water, it is the USCG, that provides the enforcement function, for any Federal agency, that doesn't have Police Powers. Nobody messes with a Federal Marshal. Their Police Powers are valid anywhere inside US Territory, Period... including Military Bases. The USCG has those same Police Powers on ANY navigable body of water, for US flagged Vessels, as well as foreign vessels inside US Territorial waters, PERIOD... No one messes with a USCG Boarding Party, either...

Just Say'en.....

and they are WRONG, and any enforcement action by some local or State
Cop, would be thrown out by the first Court of Jurisdiction, when the
Relevant Statutes, and FCC Regulations, are presented to the Judge. If
not there, then the first Appeals Court. Usually these things never make
it to a Court, as the Prosecutor doesn't want to be overturned, or
laughed out of Court, for not knowing the relevant Statutes, in the
first place.

Just Say'en.....

Um...Guys...

The low end of the 420-450 amateur band IS being used by police, fire,
business, etc in border areas. I have a tower in Colden, NY where one
lives...

I give you example WPMF670
http://wireless2.fcc.gov/UlsApp/UlsSearch/license.jsp?licKey=1293747&__newWindow=false

There are about 40 of these in just Erie County, NY

The rules pertaining to use of 421-430 mhz by other then amateur radio
47CFR90.273"
http://edocket.access.gpo.gov/cfr_2010/octqtr/47cfr90.273.htm

Detroit, Cleveland, and Buffalo are the areas its possible

421.2500 mhz & 426.2500 mz.

I know.

>What he's talking about here is the two frequencies are actually shared
>with both ham and police. But some police departments feel because they use
>it, you can't.

Aren't those frequencies reserved for law enforcement use only?

From the US Amateur 70cm bandplan at the ARRL website:

70 Centimeters (420-450 MHz):
420.00-426.00 ATV repeater or simplex with 421.25 MHz video carrier control
links and experimental

426.00-432.00 ATV simplex with 427.250-MHz video carrier frequency

http://www.arrl.org/band-plan-1

Nothing there says it's even a shared service.

Do a internet search for Morse Code decipher type program, where you can
put your computer microphone next to the speaker on the radio and it
will listen to the code and decode it for you.

Find a CW program and teach yourself morse code.
Its not hard.
Learn the numbers first - if you need to learn something fast.
They are a sequence of 5 dots or dah's.

My sentiments exactly -

First off - this is a scanner forum.
Second off - they never gave his call sign.
Third off - just because a person hold a call sign, does not make them a ham radio operator - as in world class ham radio operator.

There is plenty of LIDS in this world, who's only goal in life, is to check into the Rooster Net every morning, crow like a chicken and make a fool of themselves and then talk about their aches and pains and complain about how expensive everything is and then leave.

That does not make the Hiram Percy Maxium.

At the same time, a person does not move and then after moving say - oh and by the way, I would also like to expect to use my amateur radio equipment and put up my own tower.

The world does not revolve around you, and even if it did, if you were the only ham there, what would they do with that tower in a couple of months after you died?

There are rest home communities and even who developments that involves senior citizens who operates their own ham radio equipment.
One such town in Arizona - has 3 or 4 ham radio clubs just in their one town alone - and fully manned and maintained stations which all members of their gated community is allowed to operate anytime they wish.

Negative publicity isn't going to get you any brownie points - when we already have 700,000 licensed hams - most of which are only Technician class license holders, who walks around with their $50 - $150 handi talkies - who does not understand how amateur communications really works.

All they understand is that their cell phones and their cordless phones works on the principal of wireless - and so they do not need to invest in all kinds of radio equipment, antenna's, power supplies, SWR meters, coax, towers, computers for logging etc.
All you need is a walkie talkie and a local repeater so you can jabber like a monkey in a tree.

If this person was a real ham - as others has said, they would have already invested in a computer - (I know - taboo to stupid old folks who refuses to learn anything) and a mic and a head set and internet access and they could literally check in to thousands of repeaters all over the world.

Even that does not make them a real good ham, but at least it allows them to stay active...
This topic is several years old
I know because I saw the same newspaper article a year or more ago.....

http://www.arrl.org/band-plan-1

http://www.dxzone.com/cgi-bin/dir/jump2.cgi?ID=26712

Technically - it cannot be Amateur Radio - since Amateur radio operators are not allowed to operate on 5900 / only 5100 - 5400 kc's and even then only on certain frequencies - channels if you prefer and not just anywhere you desire to turn the knob.

So then all you have to look at is what is authorized to operate on the 5900 Kc range - some type of government transmission, commercial radio?

By understanding the band plan - you can determine what countries you can talk to... Or which countries permit a certain frequency for use.

Long before cell phones, I saw people driving while reading pocket books, which they held against the top of their steering wheels while driving. When their cars drifted off the road, they would correct to bring themselves back into the center of their lanes. But how could the police know after a crash whether it was caused by the guy reading a book or not? Probably they couldn't. So the statistics on such a thing are highly suspect. Whenever I

see statistics, I always ask myself, "How would I determine such a thing?" And, If I couldn't figure out the answer to that. I reason that there probably isn't any answer, and they are just blowing smoke......

With cell phones, it's pretty easy to determine if they were in use when the accident happened, since there are records of time/location (cell)/duration/etc. that the police can access within minutes.

That being said, it would still be conjecture as to whether the person being on the phone was directly involved in the accident (barring eyewitnesses seeing the driver texting, etc.)

Yes. I don't text. I don't even know how to text. When my cell phone rings while I am driving, I pick it up and say, "Hang on a minute". then I pull over to the side of the road and continue the conversation after I am stopped. I can't see how this could result in an accident, unless it is impossible for me to pull over, in which case the person calling me would just have to wait. I see no purpose in texting anyone at any time. Speaking is faster and doesn't require the use of your eyes. There is no way to insure that other people on the road with you are driving safely. There aren't enough policemen to have one in every car. So, it is just one of those million hazards that you have to put up with in life that may kill you. If you can't handle it, then you should move into a padded cell somewhere and give up living altogether.

It's all part of the nanny state. And you can't blame liberals for all of it, conservatives have come up with more than enough of this silly crap as well.

The way I see it, if talking on a hands-free phone or a CB, ham radio, etc., is a hazardous distraction, then would not talking to a passenger, listening to the radio, or humming your favorite tune also be JUST as dangerous? Are we ready to have a one-person-per-car rule, with no radios/tape players/CD players/mp3 players, ad inf.?

I remember when I was a kid, we were FREE to ride our bicycles/scooters/skates/skateboards without some government entity telling us we had to wear a helmet, knee pads, elbow pads and a sweaty vinyl reflective vest (even in the bright summer sunlight!).

And some are making a big deal of Romney carrying Seamus in a cartop carrier.. I seem to remember that there have been, for some time (not sure about NOW), cartop carriers specifically made for pets, complete with food and water dispensers. And damn... is that any more dangerous for your pet than (or even AS dangerous), say, letting them ride in the back of your pickup (still done in rural areas all the time)? Or, for that matter, letting them ride in your car with a window open?

Point being, I'm so tired of having our "servants" tell us how we must live. Allow people the freedom to make their own choices and their own mistakes. Yeah, WARN them of the possible consequences of a given action, but don't force them to go to ludicrous extremes just to be able to do anything.

(falls off her soapbox)

Well, I mostly agree. I blame it on the liberals, whether they are Republicans or Democrats. I agree that it isn't the governments business how I go about protecting/not protecting myself. Its my head, and using our socialized medical system as an excuse to force me to protect it is wrong. However, when it comes to forcing me to protect my dogs and children, that's a different matter. Until they are 18, I think its OK for the government to make laws that protect them from harm. After all, both you and I know that there are some people who should never have children....Or pets, for that matter.

There is no difference between having a hands-free phone conversation and simply talking with someone else in the car with you. The next law will be either you can't have passengers in the car with you, or if a cop sees you open your lips while driving down the road you'll go to jail. What country do we live in again?

[...]
> The way I see it, if talking on a hands-free phone
> or a CB, ham radio, etc., is a hazardous distraction,
> then would not talking to a passenger,

THAT argument is the one that cuts to the core
of this idiocy.

Don't forget how much Police, Fire, Ambulance,
Taxi, City Bus and package delivery services
depend on being able to talk while driving!

It's incredible to me that we were warned long ago
that for a government to try to be all things
to all people, to try to be a PARENT over all
citizens and to try to eliminate all hazards
quickly becomes a nightmare.

Franz Kafka and George Orwell's warnings have
not been heeded and the horrors they depicted
seem OPTIMISTIC as things progress to levels
even worse than what they warned about.

The USA used to berate the USSR for the abuses
that STATEISM represent, but our government
has become even worse than what we once berated.

Uneducated boobs posing as "social workers" are
attempting "social engineering" in various ways.

They won't be happy until we live in a world of nerf foam.

Already, more kids have allergies not because they
are exposed to pollen, cat hair, dog fur, etc.
but because they were NOT exposed to many of
those things as kids when they would have
developed an ability to cope.

Immunizations are a double edge sword like that as well.

If you are immunized against whatever disease,
you are not protected against as many variants
as you would be if you actually got the disease.

Kids were vaccinated against Polio long after
Polio was gone and vaccination deaths outweighed

the risk of the disease. NOW Polio is a threat
again because of heavier international travel.

I'm not against vaccinations but the "back end"
problems need to be considered more carefully
and contamination hazards need to be addressed
more seriously, and without legal immunity or
actuarial tables car companies made so famous
when Pintos were killing people.

(Ford decided the insurance risk and death payouts
were smarter than recalling the fire trap car.)

I'm not arguing against seat belts, but lots of
people overlook that seat belts actually do kill
people too. It's a matter of actuarial tables.
Statistically you are better off to use them
than not, but writing off the down side is a lie.

If you found out that your Mom died because
the seat belt killed her, you won't like
being told that it's an anomoly or having the
risk/benefit ratios explained to you.

As a kid I wore helmets for snowmobiling and
mini bike riding. I've often wondered if the
WEIGHT of these helmets don't actually cause
some extra problems.

Then again, when I was a teen I actually
brought a shotgun into the local high school.
(Firearms safety classes)

And trap shooting (clay pidgeons at a gun range)
was a unit in school psysical education classes.

I think we are being regulated to death
by STATEISM guided by fake "social workers"
with a "Chicken Little" mindset.
Government as PARENT over all of us.

I thought that making cell phones and
ham radios "hands free" was good enough.

Video and cameras catching people reading
or texting while driving
(like the bus driver a few months ago)
seemed like a good solution.

Going after hands free really does compare
to having a converstion with passengers.

Some people just can't walk and
chew gum at the same time.

We must all be dumbed down to the
most incapable common denominator.
That is the government way.

Nah...

Regulate them,
{Helmets Required}
License them,
{Eco-Friendly 'Sustainable' Materials}
...and... -drum-roll-please-
TAX THEM !
{Require Every US Citizen Buy One and
Pay Taxes on It -or- Give-Up Their Right
to Freedom Speech} [[Obama-Speak]]

Hey the Obama-Regime could make them
"Soap-Boxes" a One-Time-Use item and
Require a Mandatory 'Recycling Fee' at
the Point of Sale along with all the
other -rotfl- 'Free Speech' Taxes.
* The Soap-Box Minute Tax
* The Soap-Box Word Tax

Radioguy is a troll who is prone to exaggeration or even outright lies. I'll
bet not a one of you looked at the laws in Evanston, did you?

Below is a proposed cell phone law for the city of Evanston. NOTE that there
are NO provisions for or CB or Amateur radios mentioned.
And yet another web site mentioned that this politician wants to also ban
```

the use of "other, portable electricic devices" while driving. Nowhere is ANY mention made of Amateur or CB (hard to tell the difference these days) radio.

"Nearly two years after an alderman successfully pushed for an ordinance making it illegal to use a hand-held cell phone while driving, she is now seeking a total ban.

Speaking during the aldermanic comment portion of the Evanston City Council meeting, Alderman Jane Grover, 7th Ward, said Monday she plans to press for a total ban on cell phone use while driving in Evanston, going beyond last year's move which allowed hands-free use of a phone while driving.

Grover said she plans to present the issue for discussion at the Feb. 6 City Council Human Services meeting.

She said her ordinance would ban any use of the cell phone while driving within city limits.

"In a city where we have four or five miles anywhere you want to go, it doesn't make sense your business is so urgent on the phone it can't wait until you get to that destination," she said.

Evanston City Council members approved an ordinance, effective March 15, 2010, that requires hands-free device use in an effort to curtail distracted driving.

Under the city ordinance, violators face a $50 fine, with an added $200 penalty if the violation occurs at the time of a traffic accident."

Non Libertarians never think of things like that when they make laws. They think that they are the only ones who exist, and if a law doesn't bother them, then it shouldn't bother anybody, and therefore, it must be a good thing. So new laws will continue to be put on the books, as long as each one only interferes with the lives of a minority of the people, until we are all cowering in a padded cell somewhere, unable to move without breaking some law or other...

That's true. And pets and children both should qualify as a, "me", who
deserve to be protected from idiots who would harm them.

- The point of the law is not to protect you.
- It is to protect me from you.

Nah Dave,

The 'law' might ?protect? you after the fact.

More to the "Point" :

The Point of the Gun is NOT to Protect You.
It {The Gun} IS to Protect Me from You.

- Idiot.
- We're talking about a no mobile use law, not guns.

Dave Dave Dave, you talking on anything
while you are mobile {driving} is more
dangerous than a loaded gun; especially
if'n you 'be' suffering from the after
effects of M4* Mania.

* "M4" : Mucho Medical-Marijuana Madness

Now getting back to the topic of 'Radio'
-as-heard-on-the-radio-today-

Michael Savage [KTSE-AM 650 kHz] got into
a rant about the Toxic {Poisonous} effects
of Marijuana Smoke and it's overall relative
harmfulness to one's personal Health compared
[~4-to-1] to the standard Tobacco Cigarette.

Yeah, but...

No fair just quoting the "laboratory" results. In the real world, the DELIVERY system is everything.

The human lung is made to process AIR, not smoke...and it has been proven conclusively time and again that smoking (of any substance) CAUSES cancer...and emphysema...and cardiovascular problems...and a host of other ills.

So, nice self-serving rationalization, but no cigar.

Then why is there no elevated cancer rate among chronic pot smokers? No
cigar but perhaps a blunt?

"People who smoke marijuana do not appear to be at increased risk for
developing lung cancer, new research suggests.

While a clear increase in cancer risk was seen among cigarette smokers
in the study, no such association was seen for regular cannabis users.

Even very heavy, long-term marijuana users who had smoked more than
22,000 joints over a lifetime seemed to have no greater risk than
infrequent marijuana users or nonusers.

The findings surprised the studyï¿½s researchers, who expected to see an
increase in cancer among people who smoked marijuana regularly in their
youth.

ï¿½We know that there are as many or more carcinogens and co-carcinogens
in marijuana smoke as in cigarettes,ï¿½ researcher Donald Tashkin, MD, of
UCLAï¿½s David Geffen School of Medicine tells WebMD. ï¿½But we did not find
any evidence for an increase in cancer risk for even heavy marijuana
smoking.ï¿½ Carcinogens are substances that cause cancer.

Tashkin presented the findings today at The American Thoracic Societyï¿½s 102nd International Conference, held in San Diego.Boomers Reaching Cancer Age"

IM (libertarian)O, this is a law made to be broken. I would record (with a small hidden camera) everytime I was stopped for any reason and broadcast the recording on Youtube. I would also encourage others to do the same, and I might even start a bsiness installing the recording equipment on cars. If it happens, especially on either my, or public, property, it is my constitutional right to record it. After all, just what are the police afraid of? The truth? If they don't commit any crimes, then they have nothing to worry about. Don't forget. These guys are our public servants.....

I gotta hand to it to you, you keep coming up with the damndest bullshit
that even tops my stuff.

No it is not illegal to videotape an officer performing his duty in public.
When they say it is illegal, have them identify the law. I'll bet they
won't do it.
And there certainly is no law preventing anyone to broacast an officer's
conversation.

Why? There's this little thing known as "Freedom of speech", for starters.

If they are in public, there is a diminished expectation of
privacy.
An officer filmed giving a citation to a driver, for whatever
reason, shouldn't expect his actions are private.

>And there certainly is no law preventing anyone to broacast an officer's
>conversation.
>

Yes and no. It would depend on the context.
A simple speeding ticket probably could be broadcast. If it's
something that could harm an investigation, probably not.

>Why? There's this little thing known as "Freedom of speech", for starters.

How does that apply?

Wouldn't broadcasting an officer's conversation be considered 'disclosing
the contents of a radio transmission to a third party'? It always was a
part of the communications act. I guess it would apply to video
'broadcasts' also.

Oh, and Radioguy, I don't usually do this in public forums, but since every
poster chose to include your screed in their response, please repeat after
me: they themselves.

82. TrunkPCR version 0.90.285 Now Available

Newsgroup: rec.radio.scanner
Date: 2012-05-05 10:11:45 UTC
From: Jay <crazy__c@hot_mail.com>
Message-ID: <jo2ud0$7aq$1@speranza.aioe.org>
Source record: 152

TrunkPCR version 0.90.285 Now Available for Downloading from the NEW Homepage:
http://www.fiftyonefiftysystems.com/TrunkPcr/TrunkPcrDwnld.html

NOTE: Moto Type-I Support *should* be finished in the next major update.

This update has Two Fixes and One Change...

May 05,2012 - Fixed: Voice Channel Skipping Condition in Trunking using Dual Receiver.
May 05,2012 - -----: Sound Card Settings now saves Use of Right Channel properly.
May 05,2012 - Fixed: Dotting Tone Detector for EDACS using Right Channel.

Version 0.90.285 Released 05/05/2012

Regards,
Jay

Have you had any luck fixing the audio problem with your Regency R1080? I have the same scanner with a similar problem. It scans fine but no audio at all, not even on weatherband. I do hear a hiss on non-active frequencies and turning up the volume control increases the volume of the hiss so it doesn't appear that the speaker is the problem. I haven't yet attempted any repairs other than cleaning the volume and squelch controls with some Radioshack switch cleaner/lubricant. Just wondering if you've had any success. Thanks. David

> won't do it.

This is currently in the courts. And it's very much under test in the courts in Chicago, where such an ordinance WAS passed recently.

> And there certainly is no law preventing anyone to broacast an officer's
> conversation.

Actually, rebroadcast of anyone's conversation without their knowledge and consent is illegal, according to the regulations of many radio services. And, recording the voice of anyone without their consent is illegal in many states. You can video them, but you can't capture the audio. That's why security cameras are silent.

And, again, it's currently under court test for live action audio/video of police activities to be broadcast without consent.

>
> Why? There's this little thing known as "Freedom of speech", for starters.

You may wish to review that Amendment, for starters. "Freedom of Speech" only refers to the ability of the citizen to speak out against the government without the government striking back in petty retribution. It does not confer a consequence free right to publicly disseminate someone else's speech without permission. "Freedom of Speech" also refers ONLY to the government not attempting to silence criticism of the government.

But considering several persons in Congress, including, to name only one, Senator Barbara Boxer calling for the censure, defunding, and summary termination from their positions, of meteorologists who do not sign onto the Global Warming Agenda; and the current program of silencing, isolation, and revocation of permit for protests in Chicago related to the NATO conference, you may wish to speak your protests to your representatives before 'Freedom of Speech" is a noble memory of a day before The Tyranny.

COPY THIS MESSAGE FAST BECAUSE JEWS AND TRAITORS DELETE IT FAST!

After Jews created Israel illegally, Israel became the main base of criminal operations for the most insane type of Jews called Zionists. Israeli Jews murdered JFK in 1963 because JFK did not allow them to have atomic bombs. Read the book "Final Judgment" by Michael Piper, available online in pdf, also google for video presentation by author. Since Americans let the Jews get away with JFK murder, just four years later in 1967, Israeli Jews murdered 34 servicemen of American Navy, and seriously wounded 174, when Jews tried repeatedly to sink the USS Liberty and blame Egypt for it. Watch online the video interviews with the actual survivors, then compare the facts to the lies spread by Jews through their propaganda outlets like wikipedia. One interview with a survivor should have been enough to turn all responsible Jews and American Traitors into fertilizer within 24 hours. Since Americans let Jews get away with JFK and USS Liberty murders, Israeli Jews murdered 3000 Americans in 9/11, this time to make USA invade Afghanistan/Iraq for Jews, and to enable Jews to impose their Jew Laws (Jaws) like "Patriot Act". Watch online the video "9/11 Missing Links" made in cooperation with contacts inside FBI, CIA, National Security Agency, US Military, who are still loyal to USA. All Jews covered up for Israeli Zionists, with the help from Traitors in Washington DC, because all Jews always protect themselves as single Jew Tribe.

Jews are not the sweet/smart/suffering individuals as they present themselves using their own Jew propaganda machines. Jews are full of hate and suffer from a whole range of genetic mental diseases like schizophrenia, paranoia, psychopathy, sexual perversions like pedophilia/homosexuality/etc, and many others, that make them prone to criminal/parasitic/corruptive behavior.

Banking Jews started their corruption of USA in 1913 with creation of the Fed. The Great Depression of 1930's was the direct result of Jew corruption. Jews used Great Depression as an opportunity to corrupt/ expand the federal government because parasites like Jews exploit host organisms through central systems. After Hitler came to power in 1933 and removed Jews from all important positions, Germany experienced unprecedented economic growth while the rest of the world controlled by Jews suffered through Great Depression. Jews did not like this precedent and immediately in 1933 Jews declared economic war on Germany. Hitler invaded Poland in 1939 only because Poland was infested with five million Jews who constantly were harassing Germany. Jews used their media power to brainwash White Americans to fight White Germans for Jews. All the official "history" has been written by lying Jews and it should be called Jewstory instead of History.

Jews are not Whites but insane mongrels who hate Whites. Jews started all the jokes about Whites like Dumb Blondes, Rednecks, Polish Jokes. The sheeple merely parroted after the Jew media. Jews are the ones who promote all those Blacks you see in the media, sports, schools, or business. Jews constantly stir up conflicts between Whites and Blacks by propagandizing the shootings of Blacks in order to take your attention away from all Jew scams. Since 9/11 Jews intensified their "Racism" tactics and their famous "Holocaust" tactics because more Americans learn every day that Jews did 9/11. Jews know they are the biggest Criminals on Earth, and that is why Jews manufactured the "Holocaust" Scam where Jews masquerade as the biggest Victims on Earth. Jews are Masters of biggest Lies and Deceptions.

Without their control of brainwashing media, Jews would be nothing more than insane rats. Only Jew scams enabled many Jews to masquerade with Ivy League diplomas, Nobel Prizes, Oscars. Jews run their college/ Awards scams like Wall Street or elections scams. Independent investigations of all Ivy League colleges would show that most Jew students are frauds with standardized tests taken by somebody else or their test results falsified by corrupt admissions offices. The biggest Jew Nobel Prize winner Einstein was a fraud and plagiarist. All you know about famous Jew "scientists" is what Jews told you, the same Jews who made you believe the "Manned Moon Landings" or "Man-Made Global Warming". Jews never invented anything but Scams and Hoaxes. Jews in Israel rank well below average in IQ scores among all nations. Basically, Israel is a hellhole where tens of billions of dollars of American taxpayers' money are wasted on worthless Jews each year.

Jews control the US Government illegally. The American democracy is a myth. Most of "US Presidents" since 1913 were crypto Jews (FDR, Eisenhower, LBJ, Obama with Jew mother) or Jew puppets. Recently, Jews in US Congress imposed on Americans yet another Jew Law (Jaw) called "National Defense Authorization Act" that threatens any American who tries to defend The US Constitution with its Bill of Rights. However, the ultimate power lies in the economies, now all mortally wounded by Jews. Jews were too greedy by exporting all real American jobs and forcing Americans to live on debt for too long. Once enough good Americans reach poverty levels, the game will be over for Jews, especially if their psychotic relatives in Israel pull another USS Liberty or 9/11.

How can Jews control the US Government with such a small Jew population? How can Jews amass so much wealth if Jews are not very intelligent? In order to answer such questions you have to look at the Big Picture painted for you by Mother Nature a long time ago. For thousands of years, each society had a small parasitic ruling class and a large working class needed to sustain the society. Mother Nature created such a social order to facilitate the evolutionary process because living conditions for humans were very tough. Mother Nature knew that a ruling class does not have to be very intelligent because any substantial intellect leads automatically to creativity needed only by working class. Instead, Mother Nature developed our human

psychology in such a way that a ruling class could rule merely by displaying symbols of power like ornamental clothes, big buildings, rituals, propaganda, and so on. For this to work, a ruling class had to be filled with psychopaths only smart enough to band together for this scam to go on, and a working class had to be filled with intelligent people busy with doing all the creative work. At least the ruling and working classes were ethnically related until around 18th century when the biggest parasitic psychopaths called Jews learned enough about the game played by ruling classes. At that time, Jews decided to have a piece of the ruling action for themselves by creating central banks or starting revolutions.

Jews were around for thousands of years. Clearly, Mother Nature created Jews on her bad hair day because Jews hated all non-Jews including her best creations. This hatred made Jews the perfect tool to exploit the weaknesses of both ruling and working classes of all normal societies. By destroying the old social orders, Jews acted like maggots decomposing dead animals. Mother Nature kept Jews around for thousands of years because she needed them to change slowly the old social orders. Otherwise, Mother Nature would abort Jews a long time ago because Jews lack the intellect to create anything. Decomposition of the old social orders was largely completed by Jews in early 20th century, at least in the Western World. Since then, Jews have been trying to become the ruling class for the whole world. Apparently, Mother Nature now uses Jews to internationalize all societies in order to speed up the evolution process because there are clear benefits in global cooperation. However, Mother Nature is well aware that Jews are useless beyond this point.

Jews corrupted all politics, economies, military, sciences, business, medicine and healthcare, education, agriculture, and all others. Through their insanity, Jews started two world wars and are about to start the third one, Jews killed millions with their invention of communism, Jews polluted the whole world with nuclear technologies, Jews destroyed agriculture and food supplies with GMO crops, Jews killed millions with the poisons produced by their pharmaceutical companies, Jews imposed on societies their sexual perversions like pedophilia and homosexuality, Jews run all organized crime including illegal drugs and prostitution, Jews own most of the pornography business, and on and on.

The old ruling classes would not be able to do so much harm to the working classes because there were many different societies with different ruling classes and the classes within each society were ethnically related. This means that fraudulent ruling classes could last forever without the working classes ever waking up. However, Mother Nature wants to make all psychopathic rulers extinct once they served their purpose in Nature. Mankind cannot live forever while locked in the old psychology addicted to psychopathic rulers, Jews or non-Jews. That is why Mother Nature used the biggest parasitic psychopaths Jews to force out the old parasitic ruling classes first,

and now Mother Nature is using the same Jews to exploit/harm the working classes in order to initiate the next evolutionary step. Many people are already ready to deal with the Jew problem. However, most people still refuse to deal with it because they are still locked in the old psychology developed by Mother Nature thousands of years ago. The latter group of people will wake up at the latest when the economies collapse.

Realize that Mother Nature made Jews screw up the attack on USS Liberty so that the survivors could tell you the truth about the US Government controlled by Jews. Mother Nature created the Internet for you so that you can research all Scams and Hoaxes done by Jews. In other words, Mother Nature realizes that it is time for you to change and Jews have to go before Jews do too much damage. Mother Nature keeps Jews around so that you can see for yourself with your own eyes that something is wrong with you. Help Mother Nature by not watching any Jew TV or movies! Help Mother Nature to change your own psychology. Otherwise, Mother Nature will bring the change violently!

99. The Golden Age of Radio: An Unscientific Poll

Newsgroup: rec.radio.scanner
Date: 2012-08-03 00:40:42 UTC
From: Truth Teller <saltyfishsa@gmail.com>
Message-ID: <a7fc43b4-a835-49d8-8ee6-ca13f0c8ee83@8g2000vbx.googlegroups.com>
Source record: 169

If there are any Old Time Radio listeners in this group I would be interested in your input. Using creativity, production, acting, writing and your totally unobjective personal taste as the criteria, rank your top ten old
time radio programs. Mine are:

1. The Adventures of Harry Lime
2. Crime Classics
3. Mr. President
4. Suspense
5. Frontier Gentleman
6. The Whistler
7. Gunsmoke
8. I Was a Communist For the FBI
9. You Are There
10. Unit 99

Points will be awarded inversely e.g. 10 points for a #1 ranking, 9 points for #2, etc. Totals will be calculated weekly for one month or however long interest in the topic remains.

Leader in the clubhouse:
The Adventures of Harry Lime: 10 points.

Incidentally a fantastic website devoted to Old Time Radio is http://www.otrcat.com/index.php/ I have no stake in the site, just feel they deserve a plug for their contribution to keeping the OTR hobby alive and well. One could spend many evenings reading the well written
synopses and histories of hundreds of OTR programs produced during that wonderful era.

Agreed on these. My adds:

Broadway is My Beat
Columbia Workshop (IIRC the name. Experimental stuff.)
parts of the Yours Truly, Johnny Dollar run
X-1 / Dim X adaptations of excellent sci-fi

My absolute favorite was CBSRMT, but that's not Golden Age.

Greetings All!

Just watching The Howling and they prominently displayed a Bearcat 101 that they were using. They were displaying the scanner in the scan mode and you could hear it trying to receive but the display keep scanning. Oh well. I have on here that I have never used just sitting on a shelf. Picked it up for a couple bucks at a thrift store and here it sits. Have a great weekend! Jon Boy.

Belfort Instrument Company (dba Belfort Instruments, DigiWx AWOS,
Gamma Scientific, UDT Instruments, Advanced Retro, RoadVista, KR
Acquisition Corporation, Utilipoint International, QuickStrategy &
Scientech) is once again trumpeting that they provided wind sensors
to the Wright Brothers.

DO NOT BELIEVE THIS COMPANY BUNK (aka BULL-SHIT)

BELFORT DIDN'T SUPPLY AN FUCKING THING TO THE WRIGHT BROTHERS (there
are NO historical records or archives to back this up)

BELFORT MANAGERS ARE SKILLED AND MANIPULATIVE FUCKING LIARS

BELFORT AIMS TO PROFIT BY LYING, DENYING AND CONCEALING

BELFORT INSTRUMENTS SELLS TO TERRORISTS NATIONS (ie. Pakistan)

Belfort Instruments Digiwx has t-shirts emblazoned with the phrase:
"The Wright Brothers Relied on Us"

American history seems to tell a very different story!

There is a Belfort Instruments company press release at:
http://www.prweb.com/releases/2003/6/prweb67805.php

It reads: "The Wright Brothers monitored these
(i.e. Belfort's) instruments as they prepared for
their famous flight on December 17th, 1903."

THIS IS COMPLETE BULL SHIT (Bruce R. Robinson style)

Here is what the Wright Brothers really wrote on December 17, 1903:

"We had a 'Richard' hand anemometer with which we measured the
velocity of the wind. Measurements made just before starting the
first flight showed velocities of 11 to 12 meters per second, or 24
to
27 miles per hour. Measurements made just before the last flight gave

between 9 and 10 meters per second. One made just after showed a
little over 8 meters."

And then there is that indisputable picture of:
WILBUR WRIGHT USING A RICHARD'S ANEMOMETER (picture)
http://www.google.com/search?q=richard+anemometer+orville+and+wilbur
http://wings.avkids.com/Book/Wright/history1_19012.html

Utilipoint International CEO Bruce R. Robinson is trying to re-write
history to include mention of Belfort and/or Friez. This is a shame
and a sham!

Buy anything except Belfort Instrument Digiwx AWOS from Bruce Richard
Robinson and company.

108. FA: Uniden Bearcat BC700A mobile/home police/fire scanner - works great!

Newsgroup: rec.radio.scanner
Date: 2012-09-13 16:19:26 UTC
From: ibm laptop <ibmlaptop2007@gmail.com>
Message-ID: <e5633e54-681d-42dc-aab0-f5aacb11beb5@d6g2000yqd.googlegroups.com>
Source record: 178

Excellent working condition, with printed manual.

See the listing for details...thanks for looking.

This is a year and a half later, and the price of my PSR-800 from GRE was about $380, as opposed to the $500 or so for the Home Patrol,
which basically does the same things.

Is it worth it:? With weekly updates from RadioReference, and easy updating of the firmware and software, when compared to the PRO-95 I had
before the PSR-800, in my view the answer is yes.

Toronto was relatively easy to program, even if, because it is in Canada, one cannot just enter a zip code and let it pull in everything
that might be relevant. In Houston one enters a zip code such as 77030 and it runs with that and installs, from scan list 150 upwards,
everything it thinks relevant for Houston and nearby parts of Texas. No such ability for Canada and Canadian cities, but it still has all
the RadioReference lists for all of Canada

The sound is definitely better than the PRO-95, also built by GRE. The use of a microSD card and the built in tap, etc. all make it worth it
in my view.

Will it handle non-standard encryption? No, but if you can find software that will do the job, a feed from the stereo earphone plug to the
computer's microphone in plug permits you to run the intercept to the computer.

Anyway, I have a few minor issues but in the main I rather like the PSR-800, its ability to record transmissions as received, and its
relative ease of use and control.

FWIW
RsH

And now Belfort Instrument Company (dba DigiWx AWOS, Gamma
Scientific, UDT Instruments, Advanced Retro, RoadVista, KR
Acquisition Corporation) finds itself in United States Bankruptcy
Court as evidenced by:
http://www.amrcaseinfo.com/pdflib/1631_15463.pdf

Belfort Instrument Company is selling to a known terrorist country as
evidenced by mention of the DigiWx AWOS on their corporate homepage
sold to:

Pakistan
Lahore International Airport (LHE/OPLA) RVR System, Lahore Pakistan

And then there is word of this:
During the first two weeks of January 2007, U.S. air strikes targeted
four sites in southern Somalia formerly under al Qaida control where
terrorists have been training and hiding for months.

"As we speak now, the area is being bombarded by the American air force," a Somali government official told Reuters two weeks ago.

The U.S. attacks targeted an area close to Ras Kamboni, a coastal village near the Kenyan border where many Islamists are believed to be hiding after being ousted by Ethiopia-backed government forces, the official added.

Four places were hit -- Hayo, Garer, Bankajirow and Badmadowe, the source said. "Bankajirow was the last Islamist holdout. Bankajirow and Badmadowe were hit hardest," he added.

The Pentagon confirmed only one air strike that took place in the south of the country, saying that it was part of a wider offensive aimed at an al-Qaeda cell that includes suspects in the 1998 bombings of U.S. embassies in east Africa and a hotel in Kenya.

Meanwhile, ABC News quoted U.S. and French military sources as saying that American U.S. special forces were working with Ethiopian troops on the ground in operations inside Somalia.

Following a thrust by the U.S. military, U.S. special forces discovered a Belfort Instruments Digiwx AWOS weather reporting system on a hill south of Ras Kamboni.

The Belfort Instruments Digiwx AWOS station was not operational as it had suffered a direct military hit from an explosion of unknown origin. But the Digiwx name could be clearly seen imprinted on the 15 foot tower which now lays on it side in pieces.

U.S. troops subsequently uncovered handheld Digiwx weather receivers in two of the camps previoulsy occupied by al-Qaeda terrorists which apparently had been left behind and abandoned.

How the Belfort Instruments Digiwx AWOS system made it to Somalia and into terrorists hands is still unknown. Whether al-Qaeda and Osama bin-Laden organizations are employing Digiwx AWOS units in other parts of the world is currently unknown.

U.S. troops have been advised to be on the lookout for additional Digiwx AWOS units under Al-Qaeda and/or Sunni/Shiite control in Iraq and Afghanistan.

U.S. special forces are reportedly monitoring the two known wireless frequencies that Digiwx AWOS transmits on, notably 464.6 and 464.75 MHz. British military sources report that signals on both frequencies have been detected but only occasionally as the terrorists seem to be running Belfort Instruments Digiwx for only short periods of time.

Belfort Instrument Company (Baltimore, MD, USA), the original manufacturer of Digiwx AWOS, has had no comment.

Why would an American company be "aiding and abetting" known terrorists organizations around the world while doing business in pursuit of the almighty American dollar? Maybe you would want to

contact them and find out why:

Much has been written about Belfort Instrument Company's
DigiWx AWOS anonymously for good reason because the Belfort
DigiWx "fur" has been flying since at least 2005. One can
find mention of Belfort's inferior weather station named
DigiWx AWOS as witnessed by:

Ten reasons to NOT buy Belfort DigiWx AWOS (keep reading)
http://www.aviationkb.com/Uwe/Forum.aspx/piloting/5041

I also am of the belief that Belfort Instrument Company has
been actively censoring anyone and any words which dishes
dirt on this inferior DigiWx AWOS weather station.

Now we have word from Belfort Instrument Company of
a "Recommended Service Bulletin" dated April 21, 2011
and numbered 2011-1.

SUBJECT: Unicom Transmission

MODELS AFFECTED: Belfort DigiWx AV100 with
either Technisonic or ICom radios

TIME OF COMPLIANCE: At owners discretion

There have been some discussions by users at congested airports of not being able to receive the AWOS broadcast over the Unicom or the weather report stepping on other Unicom communications. The following suggest may decrease the problem.

1. On the DigiWx radio, set the squelch well above the squelch break point this, in turn requires more power to break the squelch which means traffic has to be closer to the airport to receive the weather report.

2. The DigiWx standard broadcast mode is using 3 MIC clicks. At busy airports, there isn t a way for the DigiWx to determine if someone is clicking the MIC 3 times for the weather or three (3) separate pilots are clicking the MIC to talk. If this is the case, it might help to change the number of MIC clicks for weather to 5 MIC clicks. Both of the above recommendations will help reduce the number of broadcasts from the DigiWx and they are easy to do and don t cost money.

Belfort Field Service Team
800 937-2353
serv...@belfortinstrument.com

Well, I fly from one of the airports in MT with one of these DigiWx AWOS pieces of SHIT. And its beyond me to understand why changing the mic clicks at a congested airport is going to fix the problem of a DigiWx which clogs the UNICOM frequency. Just like Belfort said, DigiWx cannot distinguish who is clicking the mic 3 times. The DigiWx is stupid. When it hears any 3 mic clicks, it activates and clogs an already congested UNICOM frequency. We pointed this out to Belfort 3 years ago and THIS WAS AND CONTINUES TO BE THEIR FIX?

If I cut thru the emotion of everything ever written about the Belfort Instrument Company DigiWx AWOS, I am now a believer. Belfort doesn't know the first phucking thing about designing an AWOS to broadcast over a UNICOM frequency. I have talked with numerous pilots from other airports who have the SuperAWOS and the Vaisala AWOS. And they just DON'T have these clogged frequency problems.

Yep, you read that right:
BUY Belfort Instruments DigiWx-SHIT... Have a PILE OF SHIT guaranteed!

Have you heard about the Meadow Lake Airport AWOS Fiasco?
Quoting, http://meadowlake-airport.com/AWOS.htm reads in short:

"Executive Conclusion: Of the four candidate AWOS manufacturers, only two meet the threshold and objective system performance levels. These

are systems provided by All Weather Inc (AWI) and Vaisala. The SuperAWOS by Potomac Aviation does not pass an initial cut due to maintenance problems encountered with their SuperUnicom installed at Meadow Lake airport."

"The Belfort DigiWX "AWOS" is not a true FAA fully commission-able AWOS. Its complete sensor suite is not certified. Installation of this
system at 00V means that we would not have our weather data (METAR) accessible in the federal database which means that Flight Service and
other sites such as ADDS, XM weather, WSI, etc would not not have Meadow Lake weather data. The only certified weather info would be altimeter and visibility. While this does allow Part 91 and 135 instrument approaches, the inability to incorporate its complete METAR
data in the federal system is a deal-breaker."

"The apparent initial cost savings of the initial Belfort DigiWX acquisition is minimal and not worth the lack of functionality and usefulness to the national aviation community. Life-cycle cost of the Belfort system over 15 years is over $27,000 higher than the Vaisala system."

"It would not allow us to transition to a three letter airport identifier."

"Bottom line is that the Belfort system represents false economy, minimal pilot usefulness and is inconsistent with providing the aviation community services that make this airport attractive to current and future pilots and businesses."

"Of the remaining systems offered by AWI and Vaisala, Vaisala is the preferred system."

The complete report highlighting DigiWx shortcomings can be found at: http://meadowlake-airport.com/AWOSanalysis.doc

Now have a LQQK at this.....

Ron Lee from Meadow Lake Airport wrote in Pike's Peak Flyer: January 2009

The SuperUnicom was shut down in early August 2008 due to harmful interference on the 122.7 MHz frequency A grant was submitted and approved to get an AWOS III P/T using FAA funds. Our portion of the cost is around $4,000 although incidentals may drive it higher... but far below the $25,000 previously budgeted for an AWOS. One MLAA Board member is attempting to force a system that is not fully certified down our throats using the flawed rationale that it is cheaper that the fully certified systems offered by All Weather Inc and Vaisala. A major down side to the Belfort system is that pilots will not

be able to access METAR data through Flight Service, ADDS, on
their on-board weather systems, etc. We will very likely be
unable to acquire a three letter airport ID and maintenance
will cost much more over its lifetime than with either of the
fully certified systems. Plus in its current implementation,
there is no obvious upgrade path to getting present weather
and lightning information available in an AWOS III P/T system.
It is crucial to the safety of this airport and our usefulness
as a destination airport within the National Airspace System
that we get a state of the art AWOS. With the FAA grant, it is
amazingly affordable. But it is essential that local pilots
become informed on this matter and contact all Board members
to express their view. My opinion... based upon extensive
research on behalf of MLAA members... is that we need a fully
certified AWOS. The minimum configuration is AWOS III, with
AWOS III P/T highly desirable (objective). It needs to be the
number one priority acquisition with a target installation not
later than Spring 2009. It must not be sacrificed to pay
interest on the land acquisition.

His full report is located he
http://home.pcisys.net/~ronlee/MeadowLakeAWOSSelectionAnalysis.doc

If you're considering Digiwx AWOS... READ THIS ANALYSIS FIRST!

Following up on the post regarding the UN-APPROVED, UN-
CERTIFIED and UN-OFFICIAL weather data spewed by Belfort
Digiwx AWOS, one also needs to note that they only sold 2
units during all of 2011.

Bruce R. Robinson's 10 reasons to NOT buy Belfort Digiwx AWOS:

Ten reasons for not buying Belfort Instrument Digiwx AWOS:
1) no FAA Approved or FAA Certified wind speed
2) no FAA Approved or FAA Certified wind direction
3) no FAA Approved or FAA Certified temperature
4) no FAA Approved or FAA Certified dewpoint
5) no FAA Approved or FAA Certified density altitude
6) no FAA Approved or FAA Certified visibility
7) no FAA Approved or FAA Certified precipitation measurement
8) no FAA Approved or FAA Certified precipitation discriminator
9) no FAA Approved or FAA Certified ceiling measurement (ceilometer)
10) no FAA Approved or FAA Certified lightning detection

About Belfort Instrument Company:
Belfort used to be a leading provider of weather instruments
to the government, professional meteorology and aviation
markets. Key words: "use to be." They never provided any wind
sensors to the Wright Brothers despite their fantastic
assertion that they did! Historical archives available at the
U.S. Air Force National Museum (1100 Spaatz Street, Wright-
Patterson AFB, OH 45433) tells a very different story and

specifically mentions a "Richards" anemometer which Wilbur Wright held as pictured at: "http://wings.avkids.com/Book/Wright/history1_19012.html". The Belfort aerovane wind system on U.S. Naval aircraft carriers are currently being replaced with ultrasonic wind sensors from QPI (11207 Single Oak Road, Fredericksburg, VA 22407) which just won a $94 million dollar contract for the Moriah Wind System. Belfort wind speed and direction anemometers found on the ASOS platform are now being replaced with ultrasonic sensors from the Vaisala Group. Belfort Instruments Model 6000 visibility sensor will no longer be a part of the U.S. Air Force's OS-21/FSB program come early 2007. And despite a $500,000 U.S. government grant from NASA's Small Aircraft Transportation System (SATS) program in 2004 to build a low-cost ceilometer, Belfort didn't possess the technical smarts nor the engineering know-how to accomplish the task. So now they're importing the Eliasson CBME 80A laser ceilometer from Muir Matheson. As one can readily see, Belfort is no longer setting any standards of measurement in the weather instrumentation world. And now Belfort is propagating lie after lie about their fabled company history while trying to steal thunder from the accomplishments of the Wright Brothers. According to the National Museum of American History (12th Street and Constitution Avenue, N.W., Washington, D.C. 20560), Belfort founder Julian Friez never made it to Baltimore to set up shop until sometime in the 1890s even though Belfort officials fraudulently claim the company was founded in 1876. Thus, there was no 125th anniversary for Belfort to celebrate in 2001 even though they hosted a party to which no one came! Belfort's proclamation that it is the "Oldest Weather Company in the World" is simply yet another Belfort lie as Thomas Romney Robinson invented the first wind anemometer in 1846, six years before Julian Friez was born in 1852. Belfort doesn't even know it's own company history so they just make it up! You should wonder what other crap (eg. Digiwx AWOS) they also make up! For more information about Belfort Instrument and DigiWx, visit dogsh*t.com

Ellen H. Robinson LIKES MEEZ BIG BLACK MAMBA
http://groups.google.com/group/alt.airports/msg/08232a7de634561c
December 29, 2010

Ellen H. Robinson will SUCK and FUCK you!

Onze afternoon, i wasz catchin a snooze in my backyard on a sunny day. much to my surprize, i lifted my hat and found my neighborz Ellen H. Robinson unzipping my pants. she gestured to me with herz indexes finger over herz slender lips to be quiet. I say figures okay, she then unzipped my pants and reached in and tuggzed on my big black mamba! Imediatelzly, my blacks a mamba becomes engorged

with hot burstz of human excitementz. With a big tugz with both of herz handz, Ellen H. Robinson pluckz me black mamba to a full erctionz! she then opened herz mouthz and slipsz it over my full manhoodz. she gagz and coughz a bit but begins her suckin action upz and downz! she repeatedlyz goez faster and faster untilz i feelz my venemouz black mamba release a massive explozion into herz mouth. At first, she triyz to swallow it allz but my venomouz fluidz keepz jaculating in herz mouthz. Then, she pullz herz head awayz with herz handz still clenched on my black mamba. she coughz and gagz a minute over the concretes but then placez herz lips back on myz black mamba. Once aginz, she jerks it hard withz both handz. Again, I'z begin to release a strong venemouz fluid at a fullz flow into herz small mouth. Myz black mamba squirmz in herz handz as i release all of my venemous fluid from myz snake into herz mouthz. i'z kannotz waitz til my neighbor Ellen H. Robinson sneaks back over to my house for somz afternoonz delight. Next timz, me thinks i shall let my black mamba go hogwildz in herz anuz. if she suckz me this good next time, i shall let myz snake ezcape in herz cunt andz give her zome my brotherly love. Myz black mamba has neverz felt so good after Ellen H. Robinson wrapped herz lipz around the big headz on meez mamba!

Belfort Instrument Company does business under several names including Gamma Scientific, UDT Instruments, Advanced Retro, Road Vista and KR Acquisitions Corporation.

In Canada one cannot use the zip code method, which on the PSR-800 fills in scanlists starting at 150 so still leaves the first 149 empty.
[Tried the for Houson's 77030, so found out]... So it is relatively easy to go through the lists and change the scanlist number to an empty
lower one, such as 1 or 2 or whatever you have not used for those specific things you want to keep, then delete all of the rest via a CTRL-A
and then a delete, should you want to go that route. In Canada you are forced to be more selective to begin with, since you need to pick
Canada, Province, County and then go down from there, in the main.

So I agree that the ZIP code process is a bit of overkill as it seems to pull in all of Texas if you use a Houston zip code, but it is still
easy to strip it down in the PSR-800 IF you want to do that. I suspect it is simpler to just go to Houston and pick what you want from the
available choices. That is what I did for my part of Canada.

If you know where Timmins is, you can find these are standard descriptions for the
following:
Ontario Provincial Police
Ministry of Natural Resources
Ambulance Service [in the Timmins area is my guess for that one...]
Ministry of Transport Ontario

121. GRE/Radio Shack Scanner Maker Belly up?

```
According to the rumor mill at radioreference.com GRE, the maker of Radio
Shack scanners, has stopped making scanners. There is nothing official
from GRE but they have fired most GRE US personnel and a ham radio seller
has posted an article stating that GRE has stopped making scanners.

If it is true then Uniden will have a monopoly on the scanner market and
prices will certainly rise.

The corporate site is still up, and I still see several GRE scanners
selling here:

http://www.universal-radio.com/catalog/scanners.html

Will Radio Shack confirm?

I am looking for a service manual & schematic diagrams for a Regency Flight Scan Model # ACT-T-720A, 16 channel, VHF AM airband scanner.

I found an owners manual for this radio but I also need the service manual w/schematic diagrams.

Also, any working &/or for parts/repair radios of this make/model would also be appreciated.

I will pay for the hardware, shipping, & insurance via paypal.

I found a Regency ACT-T-720A scanner that isn't working correctly, that I may be able to fix or use for parts, that the owner said he'd give me for free if I pay for the shipping.

Thanks.

Did you do a honest Internet Search.

If you can fix a pocket AM / FM transistor radio, you can fix that model
of scanner.

If you do not have the equipment to work on radios - then the manual
will be of no use to you.

Most times the memory was the first thing to go in that particular
model.

Capacitors second.

Transistors and resistors - rarely...

Most ones I saw the front end was out of them or the LED's burned out.

Got to have a lot of hours on them to get the LED to burn out.

That is fine to use for your scanner feedline. The only time ohms are important is when you are transmitting.

Thank You Matt,

Been wondering about that since that since the old days of 300 ohm TV
twin lead (1965).

Thanx Again,

PML,

Pkoenix

It's an honest-to-god spy station. One spy is sending messages to another spy. They do it either in Morse code number groups or they have someone speak number groups.

I don't completely agree with that. Yes, once you get it working it's not a big issue[*]. But if you have mismatches you have standing waves, and if you have standing waves you have certain cable lengths that give you weaker signal levels. So it's still helpful to use a matching adapter (300 ohm to 75 ohm, for example) where appropriate, and reasonably high quality coax. The difference between 50 and 75 ohms is probably not a big deal here, though.

So are 2 meter signals the only things you'll be sending through this path?

[*] You are probably not looking for long distance reception (meteor scatter? earth-moon-earth?). For local reception, signal levels don't matter so much. The receiver has a preamp and automatic gain control, no doubt.

George

I don't understand the type of antenna he / she built.

A half wave what? J Pole?

A little secret - take a television antenna - UHF / VHF, turn it on it's side if you want. You can even use a antenna pre amp. USE a antenna rotor.

Connect the antenna to some good RG 6 Quad Shield and run it into your house, into the power injector, into some more good Quad Shield and adapter to BNC.

Turn the antenna in the direction you desire to receive in.

I used a Winegard 8200U antenna and a Channel Master CM 7777 pre amp and Channel Master rotor @ 24' in my backyard and was able to hear stations that I could not hear with my Yaesu 8900 and my Diamond V2000 antenna nor my Cushcraft 4 element 2 meter beam antenna.

If all you want to do is receive, it does not matter if the cable is 50 ohm or 75 ohm nominal impedance.. You are not going to get standing waves from reception - only transmission.

Even better cable is the hardline that the TV cable company uses from pole to pole. I think its nominal resistance is about 77 Ohm's, but its loss rate is . 07 or something or another in like 100 feet @ 500 Mhz.

Enjoy the scanner, do not expect to hear much with a home brew vertical dipole antenna.

Umm. Not true. Transmission and reception follow the same laws of
physics.

The reason you care for transmission has to do to some extent with
losses. If you have large standing waves you may actually be losing
power in the transmission line itself. Not to mention that with
a mismatched load you may not actually deliver much power to the
antenna, but that depends on the design of the transmitter, and of
the antenna tuner if one is present.

A receiver has a tremendous amount of gain and can compensate
for all sorts of mismatches - so you won't notice any difference
except on signals that are rather weak to begin with. It's at
that point you'll find that your transmission line has become
a notch filter that blocks certain signals without you knowing
it.

By building an antenna for a specific frequency band I am
assuming that that's what he wants to hear. For best reception
or transmission of any given frequency band and an antenna
designed for that band, go ahead and do the matching - why not?

Completely different thinking applies to random antennas typically
used for scanner listeners / SWLers. There, you accept what you
get for antenna performance and hope the gain in the first RF amp
compensates for a haphazard antenna / transmission line combination.

You'd be surprised. I built (actually, adapted) an offset-fed dipole from
an old rabbit ears (the kind that comes with the set) which is in my 2nd
floor 'shack'. Does a decent job across multiple frequencies.

Most hams work with vertical antennas on 2 meters.
Try running your dipole as a vertical, not as a flat top horizontal.

Phoenix - at some point in your life, you have to spend money.
We would all love to be cheap - but that isn't always going to cut it.
A antenna is a antenna is a antenna...
It doesn't matter if it is a scanner antenna, a television antenna, or a radio antenna.
What does matter is that it needs to be resonant.

2 meters FM takes place between the frequencies of 145 and 148 MHz.
If you want to listen to those frequencies - you need to build a antenna that is resonant on those frequencies and you need a receiver that can be programmed for your local repeater frequencies and you also need to monitor the simplex - non repeater frequencies.

The FM National Weather Service uses frequencies in the range of 162 MHz

MHz 162.400

MHz 162.425

MHz 162.450

MHz 162.475

MHz 162.500

MHz 162.525

MHz 162.550

Trying to use the national weather service to determine how a 2 meters antenna works is a lot like trying to use diesel fuel to see how your gasoline engine runs - without having the proper fuel to try it.

Although there is a mismatch between a antenna that is horizontally polarized and vertically polarized - if the repeater is close enough - less then 65 miles away, and if the antenna exhibits enough gain - and

if the coax has a low loss rate at 146 Mhz - then it shouldn't make much of a difference...

Take a YAGI television antenna, stick it up as high as you can get it in the air - OUTSIDE and listen.
If you are an apartment dweller in a concrete / steel reinforced building and you try to use an indoor antenna - you are not going to be very successful.

You have to be smarter then the antenna...

Here is a repeater list for the coordinated repeaters in your area..

http://www.artscipub.com/repeaters/search/index.asp?state=Arizona

Just remember that a repeater does not have to be coordinated to be legal for use.

In Western Pennsylvania, only one third of all the repeaters in use are coordinated...

Here is a list of the Amateur Radio Clubs in Arizona - pick one and go to their meeting and explain your problem and ask for help and I am sure that someone will come up with a solution...

If you think you can study and pass the tests - you might want to look into getting the Technician Class License manual and doing some studying and getting your ticket and becoming a ham and not just listening...

> Yes, that is correct........

No, it is not. 5900 is a shortwave frequency, not a scanner frequency.

5900 MHz would be correct.

TrunkPCR version 0.90.286 Now Available for Downloading from the Homepage:
http://www.fiftyonefiftysystems.com/TrunkPcr/TrunkPcrDwnld.html

NOTE: Moto Type-I Support *should* be finished in the next major update.

This update has Six Fixes and One Addition...

Oct 12,2012 - Fixed: Setting CTCSS Tone Option as Normal instead of
Reverse
when Importing a Bank from RadioReference Web
Import.
Oct 12,2012 - Fixed: Changed link on PayPal picture in Donation Popup.
Oct 12,2012 - Added: RadioReference.com v10 update. (Bug Fix)
Dec 13,2012 - Fixed: Tracking ID SubScript Error.
Dec 15,2012 - Fixed: Stack OverFlow Error #28 in COM Routines.
Dec 16,2012 - Fixed: Wrong Frequency Displayed When Started with AFC ON.
Dec 17,2012 - Fixed: Error in Spectrum Sweep Print after Canceling.

Version 0.90.286 Released 12/18/2012

IMPORTANT: If you have Upgraded ICom's Program to Version 2.20, then you
will need
to Check the [Ignore CTS] CheckBox in the COM Port Selector BEFORE Clicking
the
[Power] Button...

Regards,
Jay
